DETAILED ACTION

Status of Claims

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2006 has been entered.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-2, 4-20, and 41 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter because the invention as claimed does not produce *a useful, concrete, and tangible result*. A process that consists solely of the manipulation of an abstract idea is not concrete or tangible. See *In re Warmerdam*, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also *Schrader*, 22 F.3d at 295, 30 USPQ2d at 1459. For such subject matter to be statutory, the claimed process must be limited to a practical application of the abstract idea or mathematical algorithm in the technological arts. See *Alappat*, 33 F.3d at 1543, 31 USPQ2d at 1556-57. In determining whether the claim is for a “practical application,” the focus is not on whether the steps taken to achieve a particular result are useful, tangible and concrete, but rather that the final result achieved by the claimed invention is “useful, tangible and concrete.” (see also MPEP § 2106).

Since the claimed process comprising the steps that do not provide a concrete and tangible result, the rejection under U.S.C. 101 is proper.

Allowable Subject Matter

4. Claims 21-22, 24-40 are allowed.

Reasons for Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowable subject matter:

The prior art taken singly or in combination does not teach or suggest, an apparatus for processing data defining a plurality of first polygons and texture data therefor, to generate data defining a texture map, among other things, comprising "... such that each second polygon is defined with an area dependent upon the measure of uniformity of the texture data..., and such that the area increases as the uniformity of the texture data to be stored decreases..."

The closest prior art, Vaswani et al. (U.S. Patent No. 6,333,746) teach large amount of storage area is allocated for texture with large amount of texture details, which is opposite to the claimed invention.
